### PROFILE

Third-year Bachelor of Computing (NQF Level 8) student specializing in Software Engineering, currently awaiting final results. While my academic training has provided me with experience in full-stack software development, my true passion lies in cyber security- particularly in building secure systems and protecting digital assets from evolving threats. I am proficient in a variety of programming languages, including C#, HTML, CSS, JavaScript, Java, and SQL. I am a dependable collaborator and have consistently demonstrated the ability to deliver high-quality, secure, and innovative solutions throughout my academic journey.

---

### EDUCATION

I am a final-year Bachelor of Computing (Honours) student at Belgium Campus ITiversity, currently awaiting third-year results and seeking an internship or graduate position to complete my degree. My studies have equipped me with strong skills in programming (C# and Java), web development (MERN stack, HTML, CSS, JavaScript), and database management (MySQL, SSMS, MongoDB). I also gained experience in linear programming, mathematics, statistics, networking, software testing, machine learning, IoT, and innovation leadership—preparing me for dynamic roles in the tech industry.

---

### SKILLS

Software Development life Cycle, Database Administration and Management, Algorithm and Data Structures, Programming Languages, Communication Skills, Teamwork and Collaboration, Problem Solving and Analytical thinking, Software Testing and Quality Assurance

---

### INTERSHIPS

As an Application Support Engineering Intern at Sybrin (Pty) Ltd from April 2024 to April 2025, I collaborated with the Machine Learning team to improve algorithms for detecting and correcting bank statement errors. I worked with Sybrin's KYC solutions to enhance compliance and customer verification processes, and developed business applications on the Sybrin Platform, earning platform-specific certifications. Later, I contributed to the Software Testing team, performing manual, automated, and regression testing while obtaining LinkedIn certifications in Software Testing.
